

New Product Announcement

Creative Sensor Technology's proven FSI series impeller flow sensors are now available with scaled pulse outputs.

**COMPATIBLE WITH
ALL HUNTER
HYDRAWISE
CONTROLLERS**

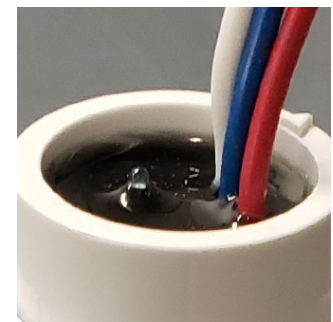

The SP3 version features an output signal scaled;

1 pulse = 1 gallon of flow.

Expand your range of flow measurement capabilities with our technology

This signal is compatible with all Hunter Hydrowise irrigation controllers so installers can provide the remote monitoring and control capabilities of Hydrowise with the proven benefits of CST 1, 1 1/2 and 2 inch tee type PVC sensors for larger residential and commercial jobs or other sites requiring higher flow rates.

- * Unmatched flow measurement range up to 160 GPM
- * Stronger 240 psi working pressure
- * Virtually no friction loss even at the highest flow rates
- * Socket weld connections, no special fittings required
- * Built for irrigation service with proven reliability

Instantly recognizable by LED and Red. White and Blue leads

Try an FSI-SP3
